# NUPAY NUCARD

THE CONVENIENCE OF CASH.  
THE SECURITY OF A CARD.

## WELCOME TO ALTECH NUPAY, LEADERS IN SECURE ELECTRONIC PAYMENT SOLUTIONS.

Altech NuPay specialise in developing world leading products servicing all markets that have a need for managed electronic payment and collection systems.

NuPay NuCard offers companies and organisations a secure card based payment solution, reducing cash on hand and creating safer working environment.

### MAKING YOUR BUSINESS SAFER AND MORE PROFITABLE!

Since 1999 Altech NuPay has provided companies and organisations, from South Africa's leading banks and financial institutions to local schools and sports clubs, with trusted and secure payment and collection systems. Altech NuPay now offers a PIN based debit card which can be credited with funds from a web-based facility.

## NUPAY NUCARD

The convenience of cash with the security of a card.

NuPay NuCard is an electronic facility whereby a registered merchant can transfer a credit value to an end customer on an electronic PIN based debit card. The end customer can then use the credit value stored on the card for card payments at any MasterCard point of sale pay point, or withdraw cash from any ATM within South Africa. NuPay NuCard can also be used as a pre-loaded expense card for employees.

### NuPay NuCard features

The NuCard product is a web based system with card and fund management capabilities allowing for real-time value transfers to cards. The NuCard product also provides reports at profile and transactional levels.

NuCard is a secure pin based card which adheres to all existing international standards for the security of data, including the encryption of the PIN.

### How does a NuCard transaction work?

Once you have been accepted as a NuCard merchant, you can use the user name & password provided to access your profile on the NuCard website. Using the unique account reference which we will provide, you can fund your NuCard profile using internet based payments. Your profile will be updated with the funded amount within 24 to 48 hours.

You then need to login to the NuCard website and order a batch of cards. As soon as the order is complete, Altech NuPay will deliver these cards to your offices. A card can then be allocated to a customer using the allocate function on the NuCard website. Once the card has been allocated, you can transfer funds from your available profile balance into the allotted card. The card can then be given to the customer. The customer will be able to use the card at any ATM and POS device nationwide.

**Altech NuPay is the market leader in the transaction processing industry with products and services that are unsurpassed and of a world-class standard.**

## Major advantages of the NuCard solution for all parties involved

### NuCard Merchant - card issuer

- Access to the user's profile on the NuCard website is safe and secure.
- Removes the risk of cash on hand and provides a safer cashless working environment.
- Reduces risk in your business and requires very little additional administration.
- Funds are transferred in real-time from the user's profile to the allocated card.
- The NuCard merchant who originally loaded the card is the only one that can reload the card. This provides greater control to the NuCard merchant.
- The NuCard merchant will have access to detailed management reports.
- Co-branding options available.

### Customer - cardholder

- The cardholder can be issued a NuCard instead of cash. This will result in greater safety.
- Each NuCard issued has a secret PIN that only the cardholder will know, resulting in more secure transactions.
- The cardholder can perform a withdrawal using any ATM within the borders of South Africa as well as make payments at any MasterCard point of sale pay point.
- The cardholder will have the ability to perform a balance enquiry via ATMs, cell phones and the internet.
- No debit orders can be run against the account linked to the NuCard that has been issued to the cardholder.
- This is a great way for the 'unbanked' to be introduced to the banking industry.

### The NuCard website - [www.nucard.co.za](http://www.nucard.co.za).

The NuCard website offers the NuCard merchant a secure online facility to:

- Order NuCards
- Allocate NuCards
- Stop a NuCard
- Load funds on the NuCard

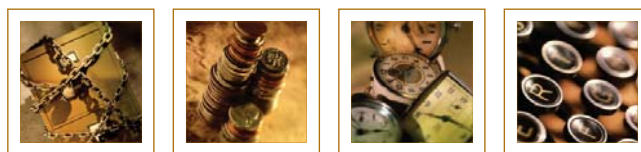

The NuCard website also offers comprehensive profile and card reports.

NuPay NuCard offers a secure PIN based debit card payment solution, reducing cash on hand and creating a safer working environment for your customers and your staff!
